Dear [REDACTED],

Yes, the size of the security feature stamp (VHK-zegel) in the Netherlands of 2.0 x 4.4 cm is the only one.

Kind regards,
[REDACTED]

Dear Sir,
Dear Madam,

I would like to thank you for your answer.

Is this size definitely the only one ?

Isn't there any possibility to have a size which would be comparable to the ones existing in other EU countries 12*32 or 16*32 ?

We are trying to figure out asap the situation so that we can tell the stamping machine maker which is the size we need. Before the end of next week, we have to figure out and confirm all technical details.

Best regards

Dear Sir Morton,

First of all apologies for this late notice. This month the Ministry of Health, Welfare and Sport of the Netherlands will provide producers with more information on the upcoming legislation for tobacco products other than cigarettes and RYO of 20 May 2024, specifically about security feature stamps.

The size of the security feature stamp (VHK-zegel) in the Netherlands is the same as that of the excise stamp (2.0 x 4.4 cm). The security feature stamp must be affixed to packaging in the same manner and in the same place as the excise stamp. This information is to be found via the following link: [Invoering Europese regels tegen illegale tabakshandel | Roken | Rijksoverheid.nl](#). I hope that this information proves helpful.

Kind regards,

Dear Madam,

Dear Sir,

Would it be possible to have more information regarding the security feature we'll have to stick on our chewing tobacco tins from May 20, 2024.

As you know, there is no excise on this product but, up to the EU regulation, a security stamp is compulsory.

So far, the countries, where we sell to, have indicated a security feature with a dimension of 10 or 12 mm by 32 mm.

Because our round tins are rather small with a 52 mm diameter and because we will have to invest in specific machines, could you please confirm whether this size of an adhesive feature will be the same in The Netherlands ?

Thank you very much indeed

Best regards
